

Thanks for contacting us for your AV requirements for the church
For an installation price would it be possible to send me a few photos of the location you would like the screen installed please? And the height at which it would be installed?
(we've installed this type of equipment for around 20 years so this info is usually enough to provide a quote)

Please find two options below:

Option 1 - Custom Articulating Screen

1x Articulating swinging projector screen arm CUSTOM £795.00

- Manual operation arm
- Custom made to suit screen model and size and installation height
- White as standard, can be painted with chosen RAL colour
- Includes horizontal beam to support projection screen; vertical pole and wall brackets with articulating mechanism to allow the mount to swing back against the wall.
- Example photo of previous design / install attached
- Typically 4-6 weeks lead time from order

1x Electric Screen with remote control operation 200cm x 200cm £219.35

Option 2 – Dual Motor / Winch Electric Screens

See full range here: <https://www.purple-cat.co.uk/projection-accessories/projector-screens/dual-motor-winch-screens.html>

1 x Sapphire Smart Move 2m 4:3 Two Motor Electric Projection Screen £1006.97

Sapphire Smart Move 2m 16:10 Viewing Area 2327mm (w) x 1268mm (h) Two Motor Electric Projection Screen
Approx. Case Dimensions L 2327mm x H 173mm x D 133mm

<https://www.purple-cat.co.uk/projection-accessories/projector-screens/dual-motor-winch-screens/sapphire-smart-move-2m-16-10-two-motor-electric-projection-screen.html>

THIS SCREEN HAS AN INBUILT DUAL MOTOR THAT OPERATES THE CASE AND HOIST SEPARATELY WITH USING ONLY ONE REMOTE CONTROL, MAKING THIS THE PERFECT SOLUTION FOR HIGH CEILING APPLICATIONS SUCH AS CHURCHES, SCHOOL HALLS, AUDITORIUMS AND THEATRES.

- The one motor is designed to lower the case up to 5m on hoist wires and the other is to lower the fabric.
- Radio remote control.
- The remote will operate the fabric and hoist wires separately.
- The remote control will operate the screen up to 25 meters away.
- Supplied with safety straps for additional security.
- Height adjustable hoist wires with the max drop of 5m.
- Stylish black casing.
- 3 year warranty.

Projectors

When we've installed electric screens in churches (smartmove winch / articulating screens) we typically use the Epson pro range.

These projectors have a very high brightness level and lens shift capabilities which allows you to install / position the projector off axis to the screen.

Optional lenses are also available to tailor specific throw distances. (I've calculated the 2m wide throw distance below as an example and to help with planning)

1 x Epson EB-G7200W Projector**£2195.00**

- Recommended for rooms with higher levels of ambient and natural lighting – High End
- 7500 lumens (brightness), WXGA (1280x800) Native Resolution, LCD, Lens Shift
- 1.45 - 2.32:1 Lens (Based on a 233cm wide image the estimated throw distance between projector lens and screen is 338cm – 540cm)
- Up to 4,000-hour lamp life – OEM Spare Lamps £187.00 each
- Optional Epson Wireless Adapter £79.00 each

OR**1 x Epson EB-G7900U Projector****£2950.00**

- Recommended for rooms with higher levels of ambient and natural lighting – High End
- 7000 lumens (brightness), HD/WUXGA (1920x1200) Native Resolution, LCD, Lens Shift
- 1.45 - 2.32:1 Lens (Based on a 233cm wide image the estimated throw distance between projector lens and screen is 338cm – 540cm)
- Up to 4,000-hour lamp life – OEM Spare Lamps £187.00 each
- Optional Epson Wireless Adapter £79.00 each

1x White Heavy Duty Projector Wall Bracket**(other options available)****£99.00**

- 730 - 1420 mm extendable length
- Weight capacity up to 25kg
- All pricing ex vat
